

SEKOLAH PILAR INDONESIA

International Baccalaureate World School

**Developing learners' potential in a
changing world**

Message from the Management Board

Dr. Iwan Kresna Setiadi, S.E., M.M.
Management Board of Sekolah Pilar Indonesia

Welcome to Sekolah Pilar Indonesia.

In the world that is constantly changing, our children are faced with challenges and problems that didn't even exist before. These challenges and problems can be viewed as obstacles, but we choose to see them as opportunities for our students to grow. Since 2005, we have been providing best practice education, through meaningful and enjoyable learning, to develop our students' true potential.

In our endeavour to support young minds thrive and become responsible global citizens who honour their heritage and embrace international-mindedness, we are committed to support the development of their independence, nurture their characters in becoming highly-principled individuals and foster appreciation towards diversity. These traits are essential in this diverse world, to allow the students interact comfortably in a variety of settings.

Through rigorous learning model, students participate actively and develop a sense of responsibility for their own learning. They reflect on their progress and are eager to improve. With the immense support from our talented and dedicated teachers and supporting staff, the school provides a warm and inclusive atmosphere.

We believe that through close communication with parents, we can support the students in developing their talents, skills and interests, to become creative, compassionate and resilient individuals. We're looking forward to working hand in hand with parents as well as other members of the school community, to nurture the love of learning.

What Are Our Vision and Mission?

Vision

Be an outstanding school with an Indonesian cultural identity
by providing an effective learning environment
that enables students to be:

**INDEPENDENT, HIGHLY PRINCIPLED and
to APPRECIATE DIVERSITY**

Mission

To prepare students to become intellectual and responsible citizens
To provide an effective educational environment
To preserve own culture through the learning process

Our education system is created to support the children in developing and optimizing their potential.

Established in 2005, we have been providing prominent educational experience and building an effective learning environment, to promote lifelong learning.

Sekolah Pilar Indonesia aims to develop each child's true potential through meaningful and enjoyable learning. We provide opportunities for students to explore their talents and interests, as well as to grow intellectually and emotionally. We are also an inclusive school that provides equal opportunities for all children, including children with special needs, to grow and thrive.

Sekolah Pilar Indonesia integrates the national curriculum with the best of international curricula. We have received "A" accreditation from Badan Akreditasi Nasional Sekolah/Madrasah and are an International Baccalaureate World School, eligible to conduct the Primary Years Programme.

We support and encourage students not only to have international perspectives, but also awareness of their identity and culture. It is our passion to witness the students grow into well-rounded, compassionate and competent individuals, who contribute actively to the world.

What makes our school unique?

Inquiry-Based Learning

Inquiry-based learning method enables students to actively participate in the learning through investigations and discoveries.

Project-Based Learning

Project-based learning helps students develop diverse skills through projects related to real-life contexts.

Student-Centred, Holistic Approach

Students take charge of their own learning. With student agency, they are highly engaged in the explorations. Our holistic approach ensures the balance of the development and growth in students' knowledge, skills and attitudes.

International-Mindedness, Own-Culture Preservation

Adoption of personal values which lay the foundation for the establishment of international-mindedness, as well as appreciation towards own culture.

Technology Integration

With technology-integrated learning, the students strive to be part of the global community and contribute to the advances of the modern technological age.

International Baccalaureate - Primary Years Programme IB - PYP)

Since 2011, we have been authorised to offer the International Baccalaureate - Primary Years Programme (IB-PYP) in the Early Childhood Centre (ECC) and Primary levels.

Primary Years Programme offers an inquiry-based, transdisciplinary curriculum framework that builds conceptual understanding. It is a student-centred approach to education for children aged 3 - 12
<http://www.ibo.org>

As an International Baccalaureate World School, we are committed to developing a set of personal values which will lay the foundation for the establishment of international-mindedness.

We are confident that students at Sekolah Pilar Indonesia are aware of their own culture and proud of their heritage. At the same time, they are also ready to strive to be part of the global community and to contribute to the advances of the modern technological age.

To find out more about International Baccalaureate, please visit <https://www.ibo.org>.
